DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,741,693. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Art Unit: 2642

both instant application and patent '693 claim the same subject matter. Claims 21-28 correspond to claims 1-8 of U.S. Patent No. 6,741,693. The common subject matter is a method of operating a virtual private network comprising the steps of receiving a call at a SSP, triggering or querying to a SCP, responding including routing instruction and routing the call over a private line to a switch of an intermediate carrier.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 21-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilkes (U.S. Patent No. 5,539,817).

Regarding claims 21-28, Wilkes teaches a method of operating a virtual private network and a virtual private network wherein calls made from a calling party served by an originating switch at one location (LATA No. 1) to a called party served by a terminating switch at a location serviced by an inter-exchange carrier (IEC) (LATA No. 2) are provided by multi-switch business group (MBG) services in which a private trunk selected from public CCS7 trunks is used to provide MBG services between LATA No. 1 and LATA No. 2 (Fig. 2).
